About Nihon Dento Kogyo Co., Ltd.

Founded in 1956, Nihon Dento Kogyo Co., Ltd's (NDK) original business was the plating of watch accessories with precious metal coatings. Nowadays, the company's horizons are far broader; its strength lies in its ability to offer a comprehensive range of surface treatment in numerous business sectors, combining wet and dry plating and anodic oxidation technologies to provide exactly what clients want.

NDK aims not only to earn the trust of its clients, but of the community and even the whole world. To that end, the company not only endeavors to provide solutions that meet and exceed its clients' stringent quality demands, it also has high awareness on the issues faced by the community, and strive to reduce environmental impact and prevent pollution.

The list of products made using NDK technologies is indeed extensive and includes such state-of-the-art items as fuel cell battery components. NDK remains dedicated to developing new and advanced technologies with which to help make its clients' products environmentally sound and better for local communities and for the whole world.
